Projects

My Portfolio Website [↗](#)

Nuxt.js, Tailwind, Vue.js

- My personal portfolio website where I explain myself in more detailed. You may get to know me more closely here.

Click to browse my portfolio website to get to know me better! [↗](#)

BlogApp

Vue.js, Node.js, MongoDB, SCSS

- Full-stack and responsive blog application where users can register and write their own blogs, most clicked, like-dislike and comment interaction to blogs, everything works reactive.

Click to browse my github repository where I explain in more detail! [↗](#)

TodoApp

Vue.js, Node.js, MongoDB, CSS

- Full-stack application where users can register and create their own lists, convert todo's to 'done', delete todo's, edit todo's and everything works reactive.

Click to browse my github repository where I explain in more detail! [↗](#)

QuizApp

Vue.js, Pinia, Vue Router, CSS

- The basic application shows the score you received in a quiz that was created based on questions from pinia store.

Click to browse my github repository where I explain in more detail! [↗](#)

Bedimcode Landing Page

HTML, SCSS, JavaScript, SplideJS, ScrollReveal

- I transformed the figma design which I found on the internet into a responsive website with animations.

Click to browse my github repository where i explain in more detail! [↗](#)

GameDev Landing Page

HTML, SCSS, ScrollReveal

- Animated responsive landing page that developed with HTML, SCSS and ScrollReveal library.
